

VSL SyncTalk Taskforce collaboration
March 2024

Our Vision

Building a connected ecosystem of safety and security.

**We bring connectivity, safety, management
and IoT to the people in the field using the 4G/5G
technologies**

THE MARKET: FROM PUSH-TO-TALK TO ENTERPRISE COLLABORATION

VSL Networks - Task Oriented Collaboration

Communication

Rich Media Communication
Voice, Video, Text, Location

Field

Built for the people in the field (One push)

Infrastructure

Serves as communication infrastructure to
any app on top

Connectivity

people / devices / systems
everyone to everything

Applications

SafeWorker, C4I, Healthcare, ...
And a marketplace in the future

Organization

Fully managed, secured and controlled by
the organization

VSL Networks is providing a unique value proposition

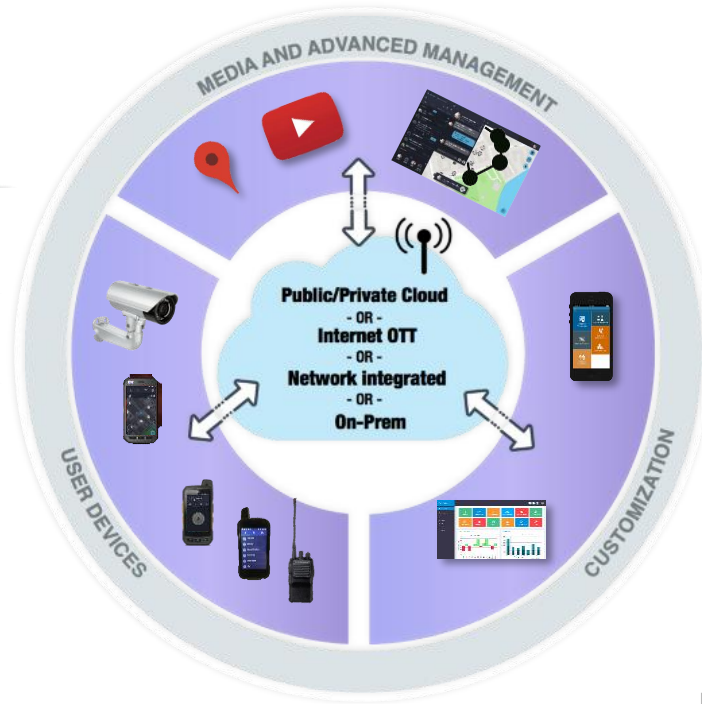

VSL Networks' solution enables instant verbal and other media communication between any individual or group of enterprise employees

Any Media – Voice, Video,
Chat, Location

Any Device – Own,
Ruggedized, IoT

Advanced Management

Integration to Enterprise IT and
Applications

Flexible

Improves productivity

Saves time

Reduces costs

Improves employee retention

Boosts employee happiness

Why VSL Networks is Unique

The radio market is transforming from the high-cost low-functionality narrow band voice only solutions into the broadband low cost cutting edge mobile technology

POC

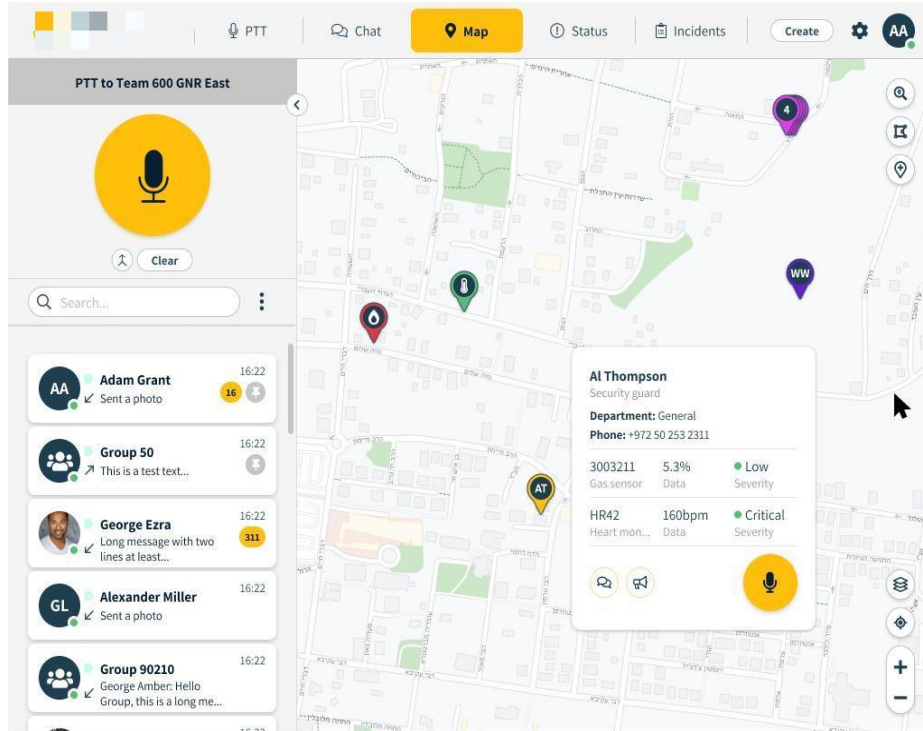

C2

Every organization that has people in the field need management tools. The broadband technology make it possible today.

POC + C2 together is unique and have even larger market

VSL Networks - Task Oriented Communication

- Intensive smart broadband media communication using the commercial cellular infrastructure
- Fully functional command and control
- Integrated with the other communication systems exists
- IoT and wearable devices support
- Superior UX that makes everything easy to use
- Fully secured
- Run on any smart phone including screenless devices

Transformative | for a Variety of real-life use-cases

Airport Ground Services

FAB Facility

Car manufacturing facility

BUSINESS CRITICAL PUSH TO TALK

Communications with ultimate connectivity

The Smart SIM technology dynamically identifies the strongest available network instantly. With access to multiple routes to multiple networks in most countries.

MCPTT syncTalk - VSL Networks Push to Talk

VSL Networks is a comprehensive, cloud-based unified communications suite, prioritizing security and privacy for field workers. It enables real-time Push to Talk, video conferencing, chat, and location-based services. Designed to seamlessly integrate with Microsoft Azure PMEC, it enhances efficiency, safety, and productivity. This versatile solution is tailored for critical infrastructure, business-critical operations, and facilities in various sectors such as Energy, Airports, Sea Ports, Transportation, Hospitals, Construction, and more, all operating on mobile and data networks.

[MS Azure Marketplace listing](#)

Challenge

- Workers today lack secure broadband media communication in busy, noisy environments, hindering productivity
- Operational and safety challenges stem from poor field collaboration
- Outdated technology fails to meet current and future needs

Solution

- Leverage private 5G (PMEC) for easy deskless collaboration via PTT (walkie talkie), video, text and location app
- Communication groups enhance coordinated teamwork in real time situations
- dispatch console empowers advanced enterprise command and control

Outcome

- Elevated field workers' connectivity from X% to 100%.
- Improved worker safety and monitoring
- Enhanced teams' collaboration and VSL Networksronization
- Enhance efficiency 25% of radio-based solution costs

Now you can create an even more productive and safe working environment

MNO Business

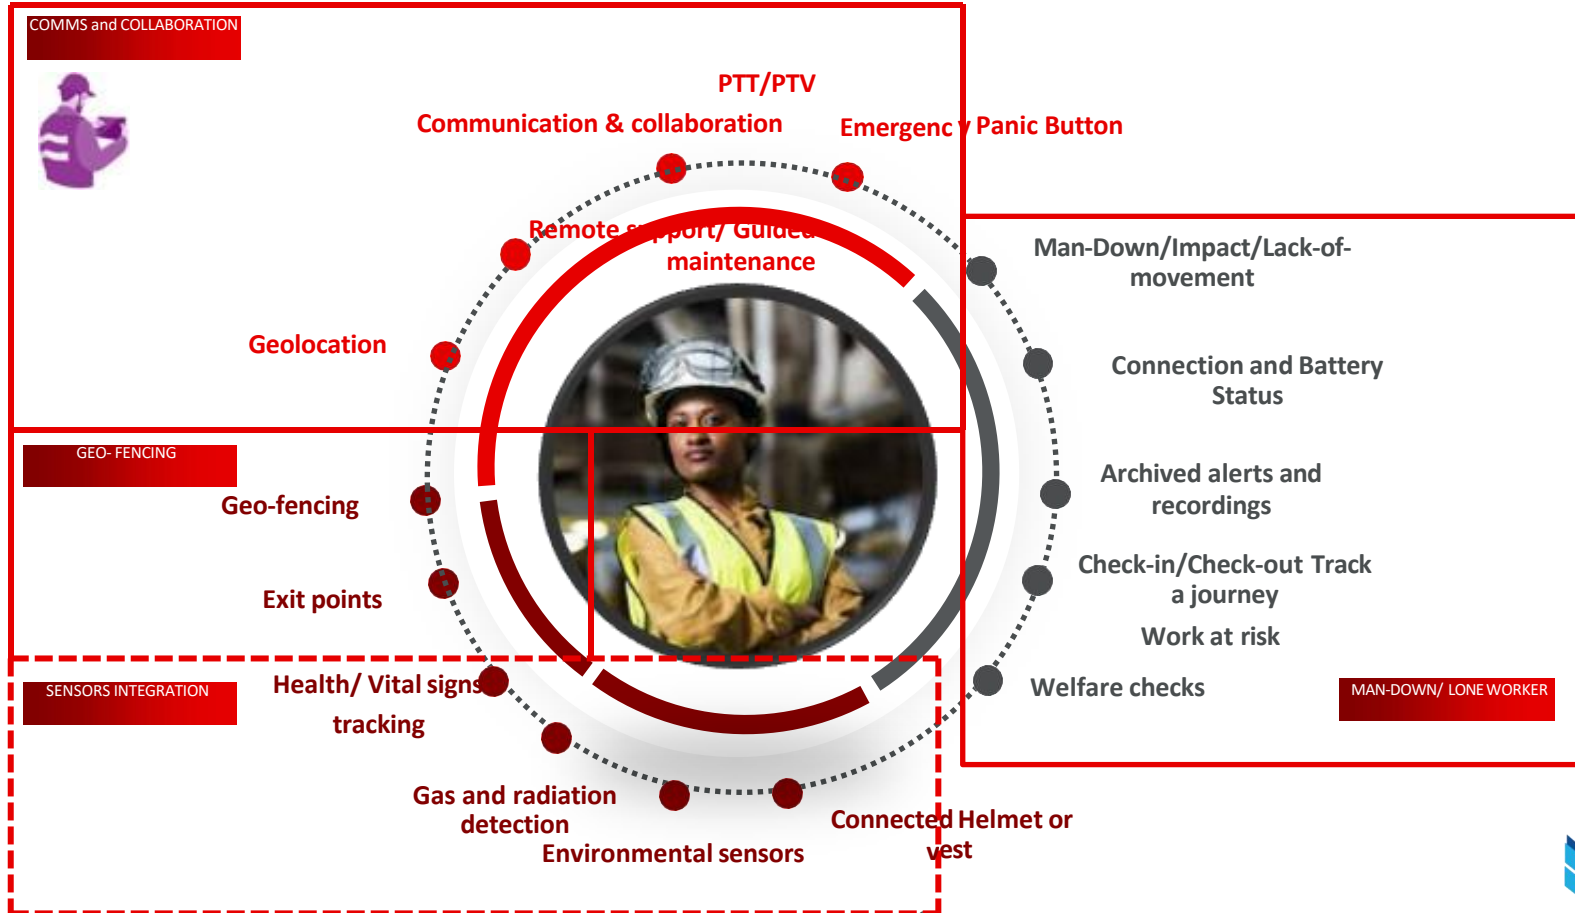

MPN Collaborative and
Safe Worker

This is how it looks in the market

Vision & ambition

**Together, we're stronger.
Building a connected ecosystem
of safety and security.**

We believe that the strongest safety net is woven from both human expertise and cutting-edge innovation. Together, we can build a future where communities feel secure, businesses operate with confidence, and everyone can navigate the world with peace of mind.

Thank You
